

Digital Health Navigation

CE-102

Continuing Education: 6 Hours

Method: Online

Welcome to this Digital Health Navigation course. Digital health is a rapidly changing field in which patient navigation professionals need to be familiar. Chances are, you will be asked to help patients use various digital health tools. The emergence of digital healthcare has influenced what things patient navigators can do to improve patient outcomes.

Study the assigned readings, view related videos, and successfully complete the final quiz on the various topics. With study, practice, and experience you will be a valuable asset to healthcare providers and, more importantly, patients.

Course Outcomes:

1. Clarify and define the various elements of **Digital Health**.
2. Become familiar with the **Electronic Health Record** and how to help clients.
3. Achieve a better understanding of the use of **Artificial Intelligence** in healthcare.
4. Gain familiarity with **Remote Patient Monitoring** and current tools.
5. Learn to introduce **Telehealth & Telemedicine** to clients.
6. Become aware of **Cybersecurity Issues** in Digital Health.
