

# Consulting Services

***The institute offers consulting services related to expanding the practice of patient navigation.***

- Help health care providers, hospitals, physician practices, insurance companies, and others who recognize the importance of patient navigation and want to include it in their operations.
- Assist institutions and organizations to implement their own patient navigation training.
- Provide access to resources offered through our community of external education and training partners such as internship opportunities, workshops, and related services.

For consulting assistance, contact the Institute at  
[Consulting@patient-institute.org](mailto:Consulting@patient-institute.org) or at 270-883-2775.
